

ASPVIK

SAFETY

We recommend you to fix the furniture to the wall with the enclosed safety bracket to prevent it from tipping over if a child climbs or hangs on it. Different wall materials require different types of fixing devices. Use fixing devices suitable for the walls in your home (not included).

A whole series of computer specialists

Each piece in the ASPVIK storage series is a specialist in its area. What they all have in common is that they're good at looking after computer equipment and paper. Naturally, they can easily hide away all the cables and cords. They're also big enough to fit everything from hard drives and scanners to faxes, drop files, binders and hole-punchers. If you choose one with a lock, you can also be sure your things are safe. Quite simply, these are practical workmates that make your job at the computer both easier and more fun.

ALL PARTS AND PRICES
